

Assy CF BLENDE SEITL AMB DashBoard Cover Blende Front RH/LH

Checking Fixture is a supporting component in the product manufacturing process which has a great influence on the quality of the product that will be optimized for its function and geometry.

With accuracy in dimensional control and geometry in checking fixture, it will also have an impact on the results of the product itself.

This CF support the component / product in checking dimensions and geometries so that product precision can be achieved to the maximum. So that failure in the next process can be minimized.
